Part Number:

366 000

Product Overview

Oval gear meters for use as in-line meters with oil and lubricants. They can be wall mounted in the fluid line or at the pump outlet.

Meters include an electronic register controlled by wetted magnets and powered with two AAA batteries. It is shock proof and isolated from the fluid handled. Meter display is multi-function, showing the volume dispensed per delivery, and has a permanent and a resettable (trip function) totalisers. The display can be programmed to show delivery in litres, quarts, pints and US gallons. The assembly is enclosed in TPE moulded shroud.

Wetted parts: Aluminium, acetal, AISI 316 stainless steel, NBR

Applications: Medium pressure dispense of lubricants up to 5.000 mPa

Inlet/outlet thread: 1/2" BSP (F)

Flow rate: 1-30 l/min

Pulses per litre: 164 ppl

Accuracy: +/- 0.5%

Temperature range (fluid): -10°C to 60°C

Calibration: can be calibrated
